

Main Accessories And Applications

A SHD cone fender system includes rubber fender, steel frontal panel, face pad, fasteners, cast-in anchors, chain systems, etc.

DESCRIPTION	APPLICATION	MATERIAL	
RUBBER FENDER	Absorb Ship Impact Energy To Protect Dock And Vessels	RUBBER, Q235	
FRONTAL PANEL	Bear The Force Caused By Fender Buffer, Increase The Contact Area With Ship And Lessen Hull Pressure.	Q235 Painted(or hot zinc/aluminum spraying)	
FACING PAD	REDUCE FRICTION COEFFICIENT TO PROTECT HULL	UHMW-PE	
Cast-in Anchors	Anchor Ferrule & Bolt	FOR FENDER FIXING TO DOCK	Stainless Steel, Q235 H.D.G
	U ANCHORU	Holding chains	Q235 Painted(or H.D.G)
Link Bolt & Nut	For fender fixing to Front panel or other parts	For fender fixing to Front panel or other parts	
Chain System	Weight Chain	Support The Steel Panel And Prevent Excessive Drooping Of The System	Q235, CM490 HDG OR PAINTED
	Tension Chain	Limit Fenders Deflection While Fender Local Part Under Strain	Q235, CM490 HDG OR PAINTED
	Shear Chain	Prevent Fenders System From Shear Deflection	Q235, CM490 HDG OR PAINTED
